Camp is applying for a local grant through the Ohio American Camp Association. It is intended to help camps create a new program to benefit campers. A few years back, Allen created a butterfly house that campers used in the summer. It only lasted for two seasons as it was not intended for long term use. Our idea for this grant was to build a more permanent structure that could last into the future. We contacted a storage barn company to build a concrete pad, wood structure, and roof. We are hoping to apply for this grant and receive \$5,000. However, the cost of the entire project is closer to \$10,000. I wanted to ask if FoCC had any available funds to help cover the difference? We would appreciate any help towards this.
